A Happy, Prosperous New Year To All

THREE INJURED WHEN RADIATOR FALLS

A near serious accident occurred in the high school gym Thursday afternoon when a 400 lb. radiator crashed to the floor from a height of about 15 feet where it was suspended on the wall and pinning beneath it Mrs. Collet, Mr. Atwood and several children.

The First Ward Primary and Sunday School Christmas party was being held in the gymnasium. Santa Claus was present with the usual toys for the children. T. L. Mendenhall was opening the meeting with prayer when the brackets holding the radiator gave way letting it fall from the wall owing to a number of pipes the impact was checked or it would have killed those beneath it. A state of excitement existed for twenty or thirty minutes. A group of men were needed to lift the radiator off those beneath it.

Mrs. Collet received a bad flesh wound on the back of her head. She was unconscious and carried out to fresh air.

Doctor Leech was called to the scene, in the meantime first aid was rendered by Mrs. Boyson and Miss Redd.

It was found necessary to take several stitches in three persons heads the others only receiving minor injuries.

When things quieted down the program was continued, the children each receiving a gift from Santa.

It is reported that those injured are recovering and nothing serious is expected to develop.

Basketball Meeting At Lethbridge Sat.

A Basket Ball meeting of considerable importance has been called at Lethbridge for Saturday Dec. 29. The meeting will be held between teams at the L. Y. P. C. A.

It is expected that the managers and captains of all the Southern District will be in attendance as well as the appointed referees. It has been felt for a long time that there should be more uniformity in the interpretation of Basket Ball rules. The purpose for calling the above meeting is to have a round table discussion of the question of basket ball rules among those principally concerned so that we may come to some amicable agreement as to their interpretation. If this can be done much of the friction can be eliminated from amateur basketball. Any game is successful only in so far as its rules are properly and efficiently administered and its officials in agreement.

This meeting is somewhat of an innovation in Alberta Basket Ball circles and its success or failure rests upon the support it will receive from Basket Ball enthusiasts. The following men have been selected to act as local referees, Paul Dahl, D. H. Galbraith and Earl Zemp.

It is expected that these three men as well as the managers and captains of the Raymond Intermediates, the R. S. A. Intermediates and the Raymond High School will be in attendance. This should give a very strong local representation.

Mr. Seamons of Lethbridge will lead in the discussion and the meeting will be presided over by C. O. Asplund, Southern Organizer.

R. H. S. NOTES

Friday night the R. H. S. Parachute dance was a great success. Many outside visitors were present and reports are that everyone enjoyed themselves to the snappy music of the Memphis Five. Many of the R. A. C. students came after their party.

Here and There

The Canadian Pacific has decided to start a new ferry service between Vancouver, on the mainland, and Sechart, on Vancouver Island, according to Captain C. D. Nereutso, manager of the B. C. Coast Steam Navigation Co. The new service will start next summer, being in line with the increased demand for ferry service.

On the trip to Victoria, the capital of British Columbia, this year numbered 30,000, according to the Victoria Publicity Bureau. Tourist travel from Canadian points and from the west coast of the United States to Vancouver Island and Victoria, via the C. P. R. and the coastal steamship service, show an increase over last year.

New York newspaper cameramen want cow-boys to do their stuff on the parapets of skyscrapers and are not content with ordinary portraits, was the somewhat bitter observation of Guy Wendick, manager of the Calgary Stampede, who returned to Canada recently from participating in Tex Rickard's radio in Madison Square Garden, New York. "They wanted real action for photographs," he said, "and we had to have policemen from the top of houses on Fifth Avenue to please them."

Grain storage facilities of the harbor of Vancouver, B.C., which are valued at \$10,000,000, will be largely increased next season, it is believed, in view of the fact that storage bins are already nearly full and the westward flow of grain may have to be reduced in consequence. It is being reported currently that the Alberta Wheat Pool, the Midland-Pacific Terminals and other groups will add storage capacity to existing terminal houses.

Over 175,000 trees have been planted along the main highways of the province of Quebec during the past two years by the Roads Department, in following out its embellishment scheme, which includes co-operation from residents along the roads. "Since the beginning of the season," states an official bulletin, "the Minister of Roads has been insisting on the importance of beautifying roadsides. Tourists can now travel throughout the province on modern and perfectly maintained roads."

"Canary Korndyke Alcartra," Holstein-Friesian cow belonging to the herd of Ben. H. Thompson of Bohrium, Saskatchewan, has been declared world's champion butterfat producer, according to an advice received by the owner from the live stock commissioner at Ottawa, stating that the cow has won the world championship with an enormous margin to spare. The record of Canary Korndyke Alcartra for 305 days was 1,080 pounds of butterfat, or 106 pounds more than any previous record holder. In the 305-day period the cow produced 26,396 pounds of milk with an average test of 4.04 butterfat.

There is no doubt in the mind of L. S. James, of New York, as the New York Central Railway, as to whether moose will attack human beings. Although the subject is a controversial one among big game hunters, decisive testimony was afforded recently in the experience of Mr. James in the Metagama district, lying between Sudbury and Chapleau in Northern Ontario. He was paddling in his canoe along the shore of the Spanish River and came upon a hull moose unawares. The animal at once gave chase and only by dint of hard paddling by Pete Comamanda, the Indian guide, were they able to escape. Another canoe in rear was similarly pursued.

Chief Hardie Demonstrates

Chief Hardie and his assistant, of the Lethbridge Fire Department were in town last Saturday demonstrating to the local fire chief and helpers how to operate the new fire engine.

Mormon Church In Detroit

\$50,000 State Structure Opened On Sunday, December 16

Dedication services for the new Church of Jesus Christ of Latter-day Saints at Davison and Sorrento avenues, the first Mormon church in Michigan, were conducted Sunday by Noah S. Pond, of Chicago, president of the Northern States Mission.

The formal dedicatory ceremony of the Mormon Church was carried out at each of three services. Affirmation of support for national and local leaders of the denomination by vote of the congregation, and the reading of the prayer of dedication from the Book of Mormon, were the main features.

In a recountal of the history of the group since the revelation of the Book of Mormon to Joseph Smith in 1831, Apostle Melvin J. Ballard, of Salt Lake City, declared the church had demonstrated a hardihood in flourishing in the face of persecution paralleled only by the case of the Jewish race.

Leaders of the Detroit chapter who took part in the dedication, included Zebulon Skousen, first counselor, and Elmer Wheeler, second counselor. More than 150 missionaries from Michigan, Ohio, Wisconsin, and Illinois were present.

The church is a \$50,000 brick structure. In design it is similar to those of the Evangelical Protestant denominations, with organ console and speakers rostrum at the center of the chancel. Ground was broken July 14 and the cornerstone was laid Sept. 9. The congregation has 500 members according to Mr. McLean.

It might be stated further that immediately after the dedicatory services Miss Velma Meldrum, and Miss Della McBride, missionaries from Raymond were guests of Mrs. De Arkes, (former Miss Jolyne David, of Raymond) at a dinner.

Magrath Carnival

Magrath Carnival opened to the public December 26 in the Assembly Hall.

Colored electric lights strung across the street in front of the Hall announced the fact that something unusual was going on inside.

We entered to behold the Hall artistically decorated with various colored crepe paper streamers and Chinese panels.

Artistic booths filled all the corners under the balcony at the rear of the hall. The Primary are conducting a fish pond and exhibition of home sewing at which a variety of useful articles are on sale.

The bishopric have a guessing booth. You may guess the weight of a large sack of wheat and win the same.

If you guess the weight of a large lump of coal you win two tons of coal. If you can guess the weight of a bulky sack of flour you may win it and it will make hundreds of loaves of bread I assure you. If you can guess the number of beans in a quart jar, sealed and on exhibition you may win a ten pound comb of honey.

A variety parlor provides the young swains with the necessary touches of physical attraction. The Y. L. M. I. A. have a very attractive booth dispensing punch, hot dogs, and ice cream cones. The stage is filled with booths providing plenty of amusement at games of skill. The Housey Housey game seems to attract the most attention. The cloak room has been attractively fitted with shelves where wraps are checked and cared for at a nominal charge.

E. P. Tanner as secretary-treasurer.

ANNOUNCEMENT

To those people who are receiving sample copies of this paper we wish to inform them that when you take this sheet from the Post Office you are under no obligation whatever.

These are sample copies and you will not be sent a bill for them. We also wish to state that those persons subscribing are running no chance in so doing as we will cheerfully refund your money if we should be the paper to withdraw from your town.

Rayo Woolf Has Narrow Escape

A fortunate escape with no bodily injury was the lucky lot of Rayo Woolf, Pool elevator Agent, when Elmo Christensen driving a truck smashed into him on the turn just this side of the elevator. Mr. Woolf was driving a Ford Coupe.

Considerable damage was done to both cars.

One of the Carnival has a neat lattice work cage in a central position in the hall where Carnival money may be purchased at the rate of one hundred dollars for ten cents. We strongly advise out of town patrons to attend the Carnival and reap gigantic returns on your dime.

Voting for the Carnival Queen is attracting the attention of young and old.

A large number of people attended the opening night and the Carnival is well away to a good start.

OTTAWA CONFERENCE DISCUSSES THE SITUATION AND ISSUES—WARNING—PAMPHLET

Toronto—The present outbreak of influenza throughout Canada is regarded seriously by the medical authorities of the Dominion. A conference to discuss the situation and to decide on steps to curb the spread of the disease was held at Ottawa today, members of the Canadian Social Hygiene Council and officials of the Dominion Department of Health attending.

It was decided to issue immediately in French and English, a pamphlet, describing the disease, and outlining treatment.

Dr. Gordon Bates, secretary of the Canadian Social Hygiene Council, issued a summary of the contents of the pamphlet here tonight.

Under the heading "How to Avoid the Flu," the following suggestions are made:

"Keep physically fit. Exercise in the open air. Get sufficient sleep in a well ventilated room. Avoid crowds. Wash your face and hands frequently and always before eating. Don't visit those who are sick unless it is absolutely necessary. Emphasis is placed on the final suggestion under the heading: "Don't Worry About the Flu."

While admitting that the situation is serious, school officials say that the type of flu, which is sweeping the country is of a mild nature.

MAGRATH YOUNG PEOPLE NARROWLY ESCAPE SERIOUS INJURY IN ACCIDENT

What might have proven a most serious accident happened Christmas Day on the newly graveled main highway through Magrath when a new Ford sedan owned by Isaac Saby and driven by his son Lynn turned over three times wrecking the car and severely shaking up the occupants.

Messrs Lynn Saby, Wayne Mathin and Whitney Henigar accompanied by the Misses Effie Saby, Gladys Toomer and Lillian Naylor were out for a Christmas spin on the new highway. As they traveled north near the center of town they noticed a truck approaching the highway from the east along first avenue north.

The brakes were applied quickly with the result that the car turned turtle. It went over three times before it was satisfied to stop. From the fact that the top of the New Ford cars are built so solid was the factor that saved the lives of the occupants.

All were severely shaken but none were injured except Wayne Mathin who suffered a bad bruise over one eye. It was miraculous that none one was not seriously injured. The highway is on the level with only a fairly deep barrow pit on each side. Had the accident happened near a cutbank or hill another story would have been told.

Moral—When you get the New Ford going at fair rate of speed don't shove on the brakes and try to stop suddenly because she means to keep going and will turn turtle with you.

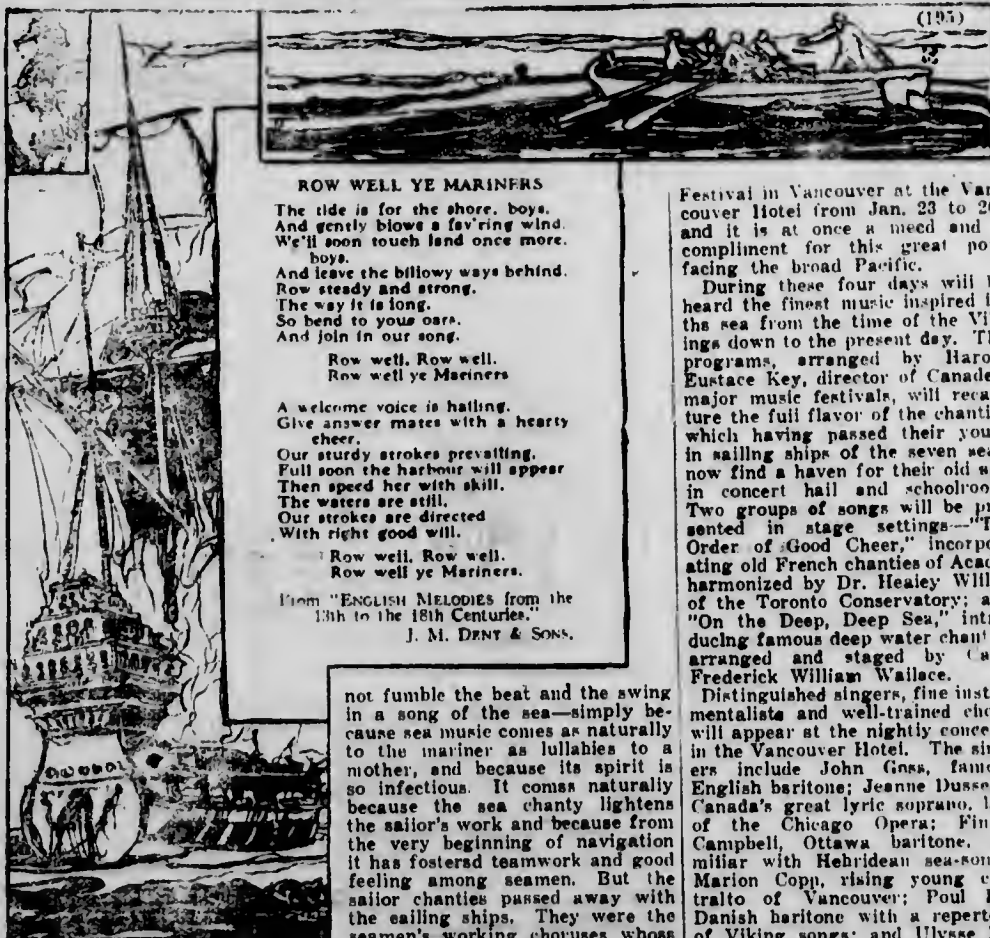

SON OF CARRIE JACOBS BOND COMMITS SUICIDE

San Francisco, Calif.—A gunshot wound through the head, "self-inflicted with suicidal intent," caused the death of Fred J. Smith, son of Carrie Jacobs Bond, noted song writer, at his Lake Arrowhead cabin, a coroner's jury found, last night. Smith was a prominent business man of Hollywood.

Excavation work is going forward rapidly at the new Second Ward Chapel site, as is also the hauling of rock and gravel for the new structure.

These two preliminary jobs will probably be finished this week.

Sea Music Festival to Revive Deep-Water Chanties

ROW WELL YE MARINERS
The tide is for the shore, boys,
And gently blows a fairing wind.
We'll soon touch land once more,
Boys.

And leave the billowy ways behind.
Row steady and strong.
The way it is long.
So bend to your oars,
And join in our song.

Row well, Row well,
Row well ye Mariners

A welcome voice is calling,
Give answer mates with a hearty cheer,
Our sturdy strokes prevailing,
Full soon the harbour wall appear.
Then spend her with skill,
The waters are still,
Our strokes are directed
With right good will.

Row well, Row well,
Row well ye Mariners.

From "ENGLISH MELODIES from the 13th to the 18th Centuries,"
J. M. DENT & SONS.

not fumble the beat and the swing in a song of the sea—simply because sea music comes as naturally to the mariner as lullabies to a mother, and because its spirit is so infectious. It comes naturally because the sea chanty lightens the sailor's work and because from the very beginning of navigation it has fostered teamwork and good feeling among seamen. But the sailor chanties passed away with the sailing ships. They were the seamen's working choruses whose utility declined when steam crowded the canvas-driven craft from the sea. There still remains a great and largely ungathered treasure of sea music which today is remembered only by grizzled sailors of clipper ship days. But as these old salts are bothered by failing memories, the tunes and the words they can still remember must be recorded soon if they are to be preserved for the future. This constitutes the real significance of the forthcoming Sea Music

And if you call for a song of the sea,
We'll heave the capstan round,
With a yoo heave ho, for the wind is free,
Her anchor's a-trip and her helm's a-lee,
Hurrah for the homeward bound!

Even Gilbert's cheap tailor, disguised as a second trombone, could

Cuticura Talcum is Cooling and Comforting

Daily use of this pure, fragrant, antiseptic Talcum Powder is soothing and refreshing to the skin. An ideal toilet powder.

Sample Pack Free by Mail. Address Canadian Depot: "Cuticura," 514, Montreal. Price, Soap 25c, Talcum 25c and 50c. Cuticura Shaving Stick 25c.

A New Year's Resolution

This is the season when with Christmas thoughts of "Peace on earth, good-will toward men" still uppermost in our minds we turn our faces toward the New Year in the hope and expectation that it will prove a better happier, more prosperous year than the one that has gone before. New Year resolutions are made, some are kept, many are broken, because man is after all very human and weak.

But there is one guiding motive in the lives of all which surely we ought to adopt and determine to keep. It will cost us nothing to do so but a little self-restraint, and it will add immeasurably to our own happiness and peace of mind, and to the peace, progress and prosperity of every local community, every province, and the Dominion as a whole. Nay more, its universal acceptance and practice would constitute a permanent guarantee of the peace of the world.

It is the essence of the Christmas message, "Peace and Good-will Toward Men." It is the golden rule of life, doing unto others as we would that they should do unto us. It is a spirit of tolerance, of brotherhood, a recognition of the rights, even the prejudices of others, and acceptance of the fact that there are other viewpoints than those we ourselves hold and cherish.

In every community and in every country there are, unfortunately, men whose greatest ambition appears to be to nullify, stamp out, kill the spirit, the ideals, the principles which the Saviour of the world taught his disciples, and for which He laid down His life. Such individuals, having certain ends to serve, thrive for a time by stirring up strife, through the arousing of passions, prejudices, hatred, disrupting whole communities, and leaving behind them a trail of disunion, suspicion, and ill-feeling where formerly concord and co-operation prevailed. These agitators, seeking self-aggrandisement or other selfish ends, pass on, but individual lives have been embittered, happy homes wrecked, communities divided, and all the old pleasant relations and amity destroyed.

It is passing strange why so many otherwise sane and intelligent people give heed to the demagogic appeals of men of this type rather than to the real leaders of their country. Why is it that men and women can be stirred to frenzy against their fellow citizens merely because they speak another language, or whose skins are of a different color, or because of birth and upbringing, have been taught to worship God through different forms to those they themselves have inherited and accepted?

Rather than be swayed by these peace-wreckers and hatred-breeder, would not Canada, and the people of Canada, find greater happiness, more real contentment, and achieve greater prosperity and attain to higher things, if, instead, they followed the leadership of Canada's real leaders, past and present?

The confederation of Canada was not accomplished by men who sought to divide the people into rival and antagonistic groups, stirring up passions and fanning the flames of racial and religious prejudice. Such men are never constructive, but always destructive. They never did, and never can build up a country. No, Confederation is the achievement of men like Sir John A. Macdonald, George Brown, Sir George Cartier, who, forgetting and submerging personal views, united and worked together successfully to unite Canadians of all classes, races, and religions into one great united Confederation.

Hon. R. B. Bennett, upon whom the mantle of Sir John Macdonald has fallen, is not preaching race and creed bitterness, but is raising his voice on all occasions for unity and sympathetic consideration by all of the convictions and rights of others.

In the Saskatchewan Legislature recently the Minister of Public Health said: "I claim that any brand of Canadianism that does not accord equality to all its citizens, irrespective of race, creed, or place of birth is a fraud. If my country means anything to me, it means that its institutions are broad enough for every man to be protected in his faith, in his liberty, and as far as justice is concerned to have a voice in public affairs and to be able to express his opinions on public subjects."

As the carillon in the Peace Tower of the Parliament Buildings, at Ottawa, in common with bells around the world, rings out the old and rings in the new, cannot people of Canada rise far above the old suspicions and animosities of the past, and, scornfully rejecting the appeals of those who would keep their country in a turmoil, accept as eternally true the words addressed by Sir Wilfrid Laurier, shortly before his death, to a body of university students: "Trust is better than fear; faith is better than doubt; love is better than hate."

Heavy Cable Tolls

South American War Crisis Cost League Of Nations Large Sum

The South American war crisis has cost the League of Nations the biggest telegraph and cable bill in its career. The council despatched the entire official correspondence relating to the dispute between Paraguay and Bolivia to nearly sixty governments, each separate despatch consisting of five closely spaced type-written sheets. The total cost amounted to over \$6,000.

King-Necked Pheasants

It would appear, from experiments tried on the ranch of R. Bray, that the ring-necked pheasant should thrive well in Southern Alberta. Last spring the Alberta Fish and Game Association bought forty chicks for breeding experiments. Two of them, now on display in a store window at Medicine Hat, are attracting quite a lot of attention.

Break Colds

Colds are quickly broken with Minard's. Rub it on chest and throat and also inhale.

Solve Arctic Mystery

Discovery Of Two Skeletons In Siberia Throws Light On Polar Expedition

Discovery of two whitened skeletons is believed to have solved the ten-year mystery surrounding the exact fate of two members of the 1916-1919 Polar Expedition of Roald Amundsen. The skeletons were found recently in northernmost Siberia.

The men involved were named Tessem and Knudsen. Both were members of the crew of Amundsen's Polar ship, the Maud. They left the expedition at the Chelluskin peninsula with letters, maps and scientific data, all of incalculable value, which Amundsen thought it desirable should reach civilization at once. Tessem and Knudsen were trying to make Port Dixon. They never arrived and nothing had been learned of them until the discovery of the skeletons.

Radio Sells For Cuban Schools

Every school room in Cuba is to be equipped with radio receiving apparatus in order that educational programs may be tuned in, a report from that country states. The students plan to construct their own sets.

Austria has marked the one-hundredth anniversary of the introduction of the accordion, devised in that country, to other parts of Europe.

The sulphur of coal smoke will make red or blue flowers much paler, or even white.

Is Losing Money Growing Prize Wheat

Must Have Support To Continue Says Herman Trelle

Herman Trelle, of Wembley, Alta., three-crowned king of the wheat world, will have to abandon experimental work on registered seed and turn to growing wheat commercially, "unless there is support coming from somewhere in Canada," he declared in an interview at Winnipeg.

"I am going broke growing high-grade exhibition wheat," he said. "I used to make money—quite a lot of money growing commercially; but practically all the money has gone on experimental work on registered seed."

The wheat king, who this year produced the largest crop of registered seed grain in the history of the world—ten carloads of it—declared "there is little money to be made in growing wheat that wins prizes in the leading shows of the world."

"If I had all the money that has been offered to me to accept various positions in the United States as the result of winning grain championships, I would not have to worry about the future," Mr. Trelle continued. "But as it is, the money I made growing wheat for the market is almost gone; and unless there is support coming from somewhere in Canada I'll have to give up. Before, I never considered the financial aspect of growing prize wheat; now I have to consider it."

TO THE MOTHERS OF ALL PALE GIRLS

If Your Daughter Shows Signs Of Anaemia A Tonic Is Needed

Anaemia is simply a lack of blood. It is one of the most common and at the same time most dangerous troubles from which growing girls suffer. It is common because the blood so often becomes impoverished during development, when girls often overwork and overstudy. It is dangerous because of the stealthiness of its approach and because of its tendency to grow steadily worse. Every growing girl should occasionally take a tonic to ward off this insidious trouble. It is because of their powerful action in rebuilding the blood that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Claire Sullivan, Pingher Creek, Alta., amply proves the value of this medicine. Miss Sullivan says: "During my school days I suffered a great deal from thin and watery blood. I was continually weak and tired, my appetite was poor, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was attacked with acute appendicitis and the operation left me in a very weakened state. My mother, learning of the value of Dr. Williams' Pink Pills, had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and now when opportunity occurs I always recommend these pills to weak, pale girls suffering as I did."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Manitoba Industrial Progress

Production In Many Lines Shows Substantial Increase

Production in almost every group of industry in Manitoba has been in excess of the year 1925. The Industrial Board's general survey has proceeded far enough to indicate the increase in production in the leading groups of industry over the previous year. Flour and grist mills have increased 18 per cent.; slaughtering and meat packing 14 per cent.; bread and baking products 10 per cent.; brewing 15 per cent.; coffee and spices 20 per cent.; printing and publishing 15 per cent.; paper 45 per cent.; stone 25 per cent.; wearing apparel 22 per cent.; and steel and iron 50 per cent. The estimated gross output for the province in 1928, is \$159,252,000, or a general increase of about 20 per cent. over the production for the year 1926.

Canada's Best Customer

Canada's trade with the Old Land is only second to that with the United States. But the difference between our trade with the United States and our trade with Britain is that whereas the United States buys from us but a fraction of what she sells to us, Britain sells to us infinitely less than what she buys from us. In one respect, therefore, and considering her population in comparison with the United States, Britain is really our best customer.

Check Colds with Minard's Liniment.

It is predicted that in ten years there will be one automobile in Europe to every 20 people, in contrast with the present one machine to every four people in the United States.

Formal Discussions Of International Problems

Says Time Has Passed When Nations Can Be Tricked Into War

Chairman Britten, of the house naval committee, says in Washington despatch, announced that he intends to propose for adoption by the inter-parliamentary union a plan for frequent formal discussion between representatives of two or more nations of their problems.

Britten divulged his plan in a letter sent to Commander Joseph M. Kenworthy, Labor member of the British parliament. The letter was in answer to a cablegram relative to a previous proposal of the chairman for a conference on naval limitation between committees from the house of parliament.

"The time has passed when millions of men and women can be tricked or blundered into war by ambitious executives of irresponsible diplomats," Britten declared. "Secret so-called diplomatic understandings and mysterious treaties affecting the very life of a nation are out of place in a world desiring peace and equality of opportunity."

As long as no agreement is reached for equality on the seas, Britten continued, every appropriation for warship construction in Great Britain and the United States would be looked upon as money wasted in competitive construction. Without an agreement, he added, the United States should "adopt a policy of national defence that would supersede all powers."

An increase in the navy because of the attitude of Great Britain on armaments was demanded in the senate by Senator Gillett, Republican, Massachusetts.

He said if Great Britain is "unwilling to reduce her naval armaments," he could see no other safe course but to increase the United States navy, and added:

"It is disagreeable to contemplate or discuss hostilities, but it is dangerous to shut our eyes to them. I thoroughly agree with recent statements in Great Britain that war between the two countries is unthinkable. Yet all declarations of the best intentions are sometimes forgotten."

Patten Estate

Chicago Wheat King Leaves Huge Amount To Charity

Nearly 50 per cent. of the estate of the late James A. Patten, "The Wheat King," who died recently, will eventually go to charity, the Chicago Title and Trust Company, named as executor and trustee, has revealed. The estate is estimated at \$15,000,000.

Upon the death of the widow, the estate is to be turned over by the trustee, one-fourth to the son, an equal share to his daughter, and the remaining one-half to be divided among seven charities.

"Hard-working wife you've got, Si." "Yes, I wish I had a couple more like her."

Demand Exceeds Supply

Canada Does Not Make Enough Matches For Home Market

Canada, it would seem, ought to possess a thriving industry in the making of matches. This Dominion produces a large proportion of the material required. Yet in the past fiscal year Canada imported matches to the value of \$90,985, as compared with \$35,346 the year before. These came almost entirely from Sweden, though there were also purchases made in the United Kingdom and United States. Exports during the year showed a decline of from \$18,470 to \$8,491, these going in small quantities to a great many countries. Canada is at the same time exporting match splints for the industry in other countries. The value of these to leave this country in 1927, was \$466,248, and in 1928, \$385,685. The United Kingdom is the principal importer while the Irish Free State is also an importer.

Six years ago there were four plants manufacturing matches in Canada, but through amalgamations there were but three in 1926, though the capital investment in the period had increased from \$2,168,775 to \$4,569,305. A total of 781 persons found employment in the industry, being paid the sum of \$523,784. The cost of materials used in the industry was \$1,069,695, the selling value of the products was \$1,943,765 and the value added by manufacture accordingly \$874,160.

While many of the chemicals utilized have to be imported the items of heaviest cost in manufacture are lumber, splints, containers, boxes and cartons, the material for which are native products. In view of this one would expect to find a greater development in the industry. Almost the entire Canadian production is domestically consumed, export trade amounting to less than one per cent. of the output.

Survey Of Resources

During the past summer a careful survey of natural resources was made in the north country along the Edmonton, Dunvegan and British Columbia Railway, and next year a smaller survey will be made in territory adjacent to the Alberta Great Waterways line under the Natural Resources Research Act.

Cobalt Production

Cobalt produced in Canada is obtained chiefly by treating arsenical silver-cobalt-nickel residues from the Cobalt, South Lorrain, and Gowganda silver camps in northern Ontario, though a small part of the production is obtained directly from low-silver high-cobalt ores.

Judge—"Prisoner, you are sentenced to hard labour for life."

Criminal—"Excellent! May I sit down for five minutes before I begin?"

Canada's Dairy Products

The total value of all products of the dairy factories in Canada in 1926 was \$133,353,076.

To Enter Canadian Banking Field

Barclays Bank Of England Makes Application To Form A Bank Here

Barclays Bank, Limited, one of the largest banks in England with resources of approximately \$1,800,000,000, is about to enter the Canadian banking field.

According to an announcement appearing in a recent issue of the Official Gazette, at the next session of parliament an application will be made to form a bank under the Canadian Bank act to be known as "Barclays Bank (Canada)."

Barclays Bank, Limited, of London, is one of the "big five" with resources as shown in the balance sheet as at the 30th of June, of approximately \$1,800,000,000.

It is understood that Sir Robert Borden will accept the office of president of the new bank.

Worms, however, generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

Navigation Closed Without Any Mishap

Everything Made Safe For Winter With No Loss Reported

The winding-up of navigation on the Great Lakes and St. Lawrence River was successful, according to reports received by the department of marine and fisheries. In the lower St. Lawrence all the equipment of the department, such as buoys and floating lights, were gathered into winter quarters without any losses whatever as far as could be ascertained.

All the ocean-going boats operating along the river and lakes reached the sea without encountering ice, and the lake and river boats were safely laid up for the winter.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Foods and Seasons

The canned food industry of Canada has effected great changes in the relation of foods to seasons. Fruits and vegetables of many kinds, with all the flavour of the freshly-gathered product, are to be had in or out of season all the year round.

Employer—Mark it five shillings a yard.

Shopman—But it cost only three shillings a yard.

Employer—That's all right; this sale is "regardless of cost."

Minard's Liniment for Asthma.

Manufacturers of all kinds of products from steel gates to jewelry, are sending representatives to the London museum to study the exhibits in order to get new ideas.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

RECOR—LAUGHS

Please omit flowers,
For Jerry McComb
He lingered too long
And her hubby came home:

"OLAFS FAVORITE HYMN
Rich men rest in feather beds,
Sailor snooze at sea,
But the davenport at Myrtles house
Is home sweet home to me.

"OH, BOY".
Lizzie Callahan is taking up physi-
cal culture and on the occasion of her
first interview with the physical di-
rector made the following replies to
his questions, "Calf?" "Fourteen
inches", "THIGH?" "Nineteen inches
"Neck?" "Yes."

Hotel guest (discovering a pair of
feminine stockings in dresser drawer)
"Here boy?" "Bell boy: "Yes Sir,"
"Guest, Take these out and get them
filled."

Joe: "Were you at the party Bob
said he had last night? "Helena;
"Wae I there? I was the party."

She was only a photographer's
daughter but she was well developed.

Try this little poker melody entitl-
ed; "I bet her she wouldnt marry me
and she called my bet and raised me
three."

"Hug me tighter said the waist to
the pants as they began to slip."

"Have you heard the lazy mans
love song?" "Nope- spill the patter".
"Moonbeams, Kiss Her for Me."

The reason they call sailboats "she"
is because they make a better show-
ing in the wind.

Every year is lap year for flappers.

Mary split her little skirt,
The tear was rather wide.
Shesaid it was an accident-
And we all saw Mary's side.

Wife: What on earth are you doing
in that old dress of mine?
Husband: Well I want a haircut,
and this is the only way I shall ever
get in that crowded barber shop.

"My mother will be surprised when
she gets my letter. 'August' she used
to say, 'you are so stupid that you
will never get a job,' and in the last
month I have had six."

The employer called his secretary.
"Here John, look at this letter.
I can't make out whether it's from
my tailor or my lawyer. They're
both named Smith."

And this is what John read: "I
have begun your suit. Ready to be
tried on Thursday, Smith."

HISTORY

1895—"Look; a motor car!"
1925—"Look; a horse!"
1955—"Look a pedestrian!"

Little Girl Next Door—"What's
the new baby at your home, Johnny,
a boy or a girl?"

Disgusted Little Brother—"Aw, it's
a girl" I saw 'em putting powder
on it."

MAGRATH COUNCIL IN REGULAR SESSION

The regular semi-monthly meeting
of the town council was held in the
town hall Wednesday evening.

Deputy-Mayor Earl Harker occu-
pled the chair in the absence of Mayor
Fletcher, who has been ill with influ-
enza.

There were present Councillors
James Meldrum, J. E. Harker, J. H.
Bridge and Benjamin Matlin, and
Secretary J. T. Steele.

A letter was read from A. A. Smith
superintendent of the C. P. R. express-
ing dissatisfaction with the north
drain ditch at the end of the town ir-
rigation system. This has not been
finished to the satisfaction of the C.
P. R. The matter was referred to the
chairman of the Works and Property
committee, who will deal with the dif-
ficulty.

I. L. Holman presented a claim for
additional damages on land bordering
on the drain ditch. The matter was
held over for further consideration by
the council.

A. M. Jensen applied for a renewal
of a lease on the old gravel pit south
of town for pasturage.

A special meeting of the town coun-
cil was held Saturday evening Dec-
ember 22 in the town hall for the
purpose of appointing a new constable.

Raymond Harris a local man was
appointed to succeed J. A. Ferguson,
resigned. Constable Harris begins
his duties at once.

WORLD HAPPENINGS BRIEFLY TOLD

Fully 18,000 people visited in September the plant at Howden, England, where Airship R-100 is being constructed.

The Duke of Abercorn has been sworn in as governor of Northern Ireland for a second period of six years.

U.S. Ambassador Schurman has presented an American fund of \$500,000 for a new hall of instruction in the ancient University city of Heidelberg.

Commemorating the 25th anniversary of the Wright flight at Kittyhawk, the Paris chapter of the United States Aeronautical Association gave a luncheon.

Premier Mackenzie King celebrated his 54th birthday, December 17. Mr. King has been leader of the Liberal party since August, 1919, and prime minister since December, 1921.

Using wolfhounds to assist in capturing their prey, R. S. Cruickshank and W. E. Hayne, of Herschel, Sask., have killed approximately 100 coyotes this season. Eighty-seven of the skins were sold to one buyer.

Parliament will likely be asked at its next session to consider legislation for the return of railway and Peace River lands to British Columbia. Hon. Charles Stewart, minister of interior, states.

On Dec. 17, Theodore Roberts was buried in Hollywood cemetery, in the city where his motion picture characterizations made him an international figure. Scores of movie stars and notoriety attended the service.

Investigation of the problem of level railway crossings throughout Canada probably will be started very soon by Hon. Frank Oliver. Mr. Oliver was recently appointed advisory officer to the board of railway commissioners for this purpose.

Commodore Bartlett, Salvage Superintendent, has advised the White Star Line that the big liner Celtic which went on the rocks off Queenstown, Ireland, could not be salvaged. Bartlett advised the company that salvage would be impracticable and recommended that salvage expense was not justified.

The New Canadian

Valuable Contribution From European Countries To Make Up Our Population

Hon. R. B. Bennett, because he has lived so long in the west, deemed it desirable, in a speech delivered in Toronto recently, to pay a tribute to what has been accomplished in that part of Canada by people who are not all of British birth, but many of whom have come from various other countries. The Conservative leader is well advised. We want Canada to be predominantly British in its population, but we have received and will continue to receive most valuable additions from other sources. Out of these have come real leaders who are genuine Canadians. To nourish a prejudice against any one on account of a difference of race is not good Canadianism; they must be judged by other characteristics. As Mr. Bennett very properly points out, Great Britain itself represents a fusion of blood of many peoples. There are today scattered throughout the western country people whose fathers came from different European countries, but who themselves are proud to be called Canadians, and proud of the privilege they have of aiding in the upbuilding of this great Dominion.—St. John's Telegraph Journal.

A teacher was trying to develop the word "sleigh." "Now, Jamesie," she said, "what is it that comes along on runners?"

"Run," answered the five-year-old New Yorker, sapiently.

"Sophia, what do you mean by wiping the plates on your handkerchief?"

"It doesn't matter, ma'am, as the handkerchief has to be washed in any case."—Kasper, Stockholm.

W. N. U. 1765

Tentative Date For Next Arms Conference

Nations Have Agreed On Eleven Months Or Next March

Agreement on March 11, 1929, as the tentative date for the next session of the preparatory disarmament commission, and an accord between Great Britain and Italy as to procedure for carrying out the agreement for settlement of the reparations problem and evacuation of the Rhineland, were outstanding developments in connection with a recent meeting of the Council of the League of Nations.

The British-Italian agreement was announced by Sir Austen Chamberlain, British foreign secretary. It was deemed important as those two powers were named as guarantors of peace on the Rhine under the Locarno pact. Their accord at this juncture was also believed to indicate an agreement concerning the powers of the commission of verification and conciliation which will be substituted for the allied troops when the latter are removed from the Rhine provinces.

Germany does not wish to see the commission function after 1935. That year was set by the treaty of Versailles as the last under which allied troops might remain in the Rhineland.

League Of Danes Organized

First Meeting Held In Winnipeg Was Very Successful

Aiming at organizing the 40,000 Danes living in the Dominion to assist newcomers from Denmark in being assimilated as citizens of this country and at the same time preserving Danish ideals and culture, the first convention of the League of Danes in Canada, held in Winnipeg recently, proved successful. It was attended by 100 natives of Denmark. An executive committee was appointed and the new society was formed under what those present regarded as exceptionally favorable circumstances. Dr. N. P. Olsen, Dominion veterinary officer, presided.

Simple—Youthful

It will be difficult to find a more becoming blouse, as simple and youthful as Style No. 299, with effective monogram embroidery, which contrasts smartly with tone of blouse. You can cut it out and make it in an hour. See small illustration showing two major parts. Neck and trimmings note, and give fitted line to shoulders. It can be made with or without the inset pockets. Wool jersey to be worn with velvet or tweed skirt is attractive for classroom. Lustrous satin crepe, flat silk crepe, cantonfille crepe, georgette crepe, wool crepe, lame, sheer crepe with metal threads, and velvet are fashionable fabrics. Paris is using this season for separate blouses, particularly popular with the youthful type of woman, both for utility and more formal occasions. Pattern for this charming blouse, made at a worthwhile saving, comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully. Emb. Trans. No. 11012 (blue) costs extra.

HIS GOVERNMENT DEFEATED

The Coates government has been defeated in New Zealand 50-28 on a no-confidence motion. Sir Joseph Ward, Union party leader, has been called to form a new cabinet. Premier J. G. Coates, is shown above. The government has resigned.

Victory Seems Complete

Public Opinion Has Been Conquered By Motor Car

The victory of the motor car is complete. No longer is it possible to doubt that the car has conquered public opinion.

The motor car first owned the town. Now it owns the township as well.

There was a time when it was seriously proposed in Ontario no motor car should appear on the highways except at certain permitted hours, morning and evening. Thus horse-drawn traffic, unmolested, could hold the roads half the day. Now the horse is seldom seen on the highway.

Not so long ago the law required motorists, on meeting a funeral or overtaking one, to come to a standstill. But the motor car overcame that difficulty by taking over the funerals and speeding them up. The departed citizen rolls along on balloon tires to his sepulchre and his funeral impedes traffic little if at all.

The conclusive victory of the motor car came the other day when a village jury, in a coroner's inquest on a farmer who had been killed on the highway by an automobile, returned a verdict recommending that pedestrians walking on the roads at night should be required to carry lights. A few years ago there was strong opposition in the rural parts to the law requiring all vehicles to carry lights. What is the world coming to? old men asked. But the regulation has come to be regarded as a necessary one. When the coroner's jury recommended that all pedestrians should carry lights after dark we expected an uprising of the embattled farmers of the province against the suggestion. There, has been scarcely a word of protest—instead, in several rural journals there have appeared items approving the suggestion as one that would work for the good of all.

The gasoline huggy has won out. The farmers drive it, the county councillors, the township councillors, the editors of the village weeklies, the members of the legislature and of parliament drive it. None of us are pedestrians any more, except now and then between rides.—Toronto Star.

Alberta Homesteads

During the week ending November 16th, 176 homesteads and 3 soldier grants were taken out at the Edmonton land office, as compared with 26 homesteads and 1 soldier grant during the same week of 1927.

Friend—I suppose, they're kept busy diggin' graves, Jarge.

Old Grave-Digger—Sometimes I be an' sometimes I baint. The trouble is people won't die reg'lar.

RADIO COMMISSION

The royal commission to investigate the radio situation in Canada was announced a few days ago. They are: (1) Charles A. Bowman, editor-in-chief of the Ottawa Citizen; (2) Sir John Aird, president of the Canadian Bank of Commerce, Toronto, chairman of the commission; and (3) Augustus Frigon, director of the Polytechnic school at Montreal. The commission will review radio condi-

Flour Industry Of Japan Unsatisfactory

Country Has To Import Wheat For Manufacturing Purposes

The present situation of the Japanese flour and grain trade cannot be described as wholly satisfactory, writes James A. Langley, Canadian trade commissioner in Kobe, in the Commercial Intelligence Journal. While flour milling is one of the industries to which Japanese interests are paying particular attention, the market has shown in lower and unsteady prices the effects of many adverse influences. The dominant factor contributing towards the falling market price for flour has been the over-extension of flour mills. In pre war days, the productive capacity of all Japanese mills was about 750 barrels per day, but it continued to increase until today the mills have a capacity of 47,240 barrels per day. Yet imported wheat continues to enter in increasing quantities. Imports from Canada during 1927 showed an increase of 100,557 barrels over 1926.

Canada, Australia and the United States continue to supply the bulk of the wheat requirements of Japan. This year an increased importation is anticipated due to the inferior grades of the domestic crops. The year 1927 showed a decrease in the exportation of domestic wheat flour to the extent of 1,200,000 49-pound bags when compared with the 1926 figures, during which period 4,605,000 bags were sold in overseas markets. The annual production of domestic wheat in Japan is about 31,000,000 bushels, and to meet the requirements of the flour mills 17,000,000 bushels were imported in 1927 for manufacturing purposes.

Growing Prize Grain

Herman Trelle Says Farmers Not Paying Enough Attention To Quality

Herman Trelle, Canada's "wheat king," interviewed in Winnipeg, stated that he was misquoted in a report sent out that quoted him as stating that he was "going broke" growing prize grain. What he meant to convey, he said, was that growing of prize grain was much more expensive than commercial farming.

"The unorganized farmer does not command the respect of the business world that he should," Mr. Trelle continued. "The struggling farmer is doing everything in his power to make his vocation a big business. He is slowly separating the proverbial hayseeds from his matted hair. We men of the soil must insist on the world knowing that farming is a big business."

"The results of the big exhibitions, however, show that Canadian farmers are not paying enough attention to the quality of grain that these exhibitions demand," he concluded.

Praise For Wheat Pool

Premier Stanley Baldwin and Ramsay MacDonald Compliment Organization

The Canadian Institution which made the greatest impression upon Premier Stanley Baldwin and Rt. Hon. Ramsay MacDonald, was the wheat pool, these statesmen told the annual meeting of the Empire Parliamentary Association in London.

Premier Baldwin said that the wheat pool seemed to him to be one of the most remarkable attempts at co-operation in self-help any body of men had made.

Mr. MacDonald, in seconding Mr. Baldwin, said in his opinion the wheat pool was one of the most extraordinary examples of co-operation to be found in the world. He also eulogized the hydro-electric system of the Dominion.

The most sensitive part of the body is the tip of the tongue.

SUNDAY SCHOOL LESSON

DECEMBER 30

PAUL'S LAST MESSAGE

Golden Text: "I have fought the good fight, I have finished the course, I have kept the faith."—2 Timothy 4:7.

Lesson, 2 Timothy 4:1-18.

Devotional Reading: Psalm 98.

Explanations and Comments

Paul exhorts Timothy to preach the Word, verses 1-4. "I charge thee in the sight of God, and of Christ Jesus, who shall judge the living and the dead, and by His appearing and His Kingdom"; thus solemnly Paul begins his appeal to Timothy. "It has all the seriousness of a last farewell, and it is made even more solemn by the phrases with which it is introduced, as the apostle charges Timothy 'in the sight of God' and also of Christ Jesus, of whose unseen presence both Paul and Timothy are conscious, to whom both must give account in the great day when he comes to 'judge the living and the dead.'"—C. R. Erdman.

And what was the charge? "To preach the word; to reprove, rebuke, exhort, with all longsuffering and teaching." "By being urgent in season, out of season, Paul does not mean that the messenger, in the urgency of his appeal, is to be inconsiderate and tactless, but he is not to consider merely his own convenience, not to preach at set times only, not to await occasions that are obviously opportune. At every possible season he must be eager to present the Word of life."—C. R. Erdman. "Not out of season to other people, but out of season to yourself, when it is an inconvenience to you."—Charles Brown. "Take opportunity, or make it."

"Have you ever talked to the clerk at the next desk, to the assistant at the same counter, to the mate at the same bench. While you have been working together have you ever put in a good word for Jesus Christ? Make the place of your daily toll the scene of your Christian service."

For the time is coming, Paul told Timothy, when the people will not give heed to sound doctrine, but in their curiosity will seek teachers after their own desires, turning away from the truth unto fables.

"This was the harvest reaped in the large communities over which the Church of Rome came to exercise dominion. When the Scriptures were neglected in the worship and preaching of the Church, the people read instead fabulous stories of the life and exploits of the saints. The number of these miraculous legends grew with the desire for them, till the great historic facts of Christianity were thrust into the background."—J. P. Lilly.

Recipes For This Week

(By Betty Barclay)

LEMON MINCEMEAT

- 4 lemons.
- 2 apples.
- 1 pound currants.
- 1/2 cup raisins.
- 1/2 cup chopped nuts.
- 1/2 cup melted butter.
- 2 cups sugar.
- 1 teaspoon salt.
- 1 teaspoon ground cinnamon.
- 1 teaspoon ground nutmeg.
- 1 teaspoon ground cloves.
- 1 teaspoon ground ginger.
- 1 teaspoon ground allspice.

Squeeze juice from lemons and cook until soft. Put through meat-chopper and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for tarts and pies.

JUNKET PLUM PUDDING

- 1 package chocolate junket.
- 1 pint milk.
- 1-3 cup raisins.
- 1-3 cup dates.
- 1-3 cup figs.
- 1 cup water.
- 1/4 cup sugar.
- 1 tablespoon lemon juice.
- 1/4 teaspoon cinnamon.
- 1/4 teaspoon clove.

Cut raisins, dates and figs in small pieces; add sugar and cook slowly until tender. Add sugar and boil until thick. Add lemon juice. Cool slightly; place in bottoms of individual dessert glasses. Warm the milk until lukewarm—not hot—and dissolve in it the chocolate junket. Add spices; pour over fruit, and let stand in a warm place until firm. Chill before serving. Top with whipped cream and maraschino cherry.

Mica In Canada

Mica is produced in Canada mainly from mines in the Ottawa region, both in Ontario and Quebec. The Quebec deposits lie between the L'Ange and Gatineau rivers, and the Ontario deposits, in the Perth-Kingston district. The mine near Sydenham, Ontario, is probably the largest mica mine in the world.

Large Bill For Ice Cream

America's bill for ice cream sodas and other fountain drinks is \$4,109,561 a day, it was disclosed at the annual convention of soda fountain manufacturers held in Chicago.

Legislation Respecting Liens

Removing Financial Obstructions To Operation Of Farm Lands In Certain Areas

Hon. Charles Stewart, Minister of the Interior, is gratified with the results of the legislation respecting liens on certain classes of western lands which he obtained from Parliament in the session of 1927.

By the work of committees set up by this Act (The Crown Debts Act) and other financial obstructions to operation placed on lands in certain areas during the dry years following 1914 to attempt to insure repayment of advances for seed grain and fodder, are being adjusted. It is expected from what Hon. Mr. Stewart learned from his study of the working out of the plan while in the West, that a number of farmers who might have been forced from the land will be encouraged to remain as a result of these adjustments, which are being made at no cost to the settler for the legal process, and that areas which have been tied up and non-productive can now be disposed of to those who will put them to the use for which they are fitted.

As explained in Parliament, where the bill was fully discussed, there was a rapid advance of settlement, especially from 1912 to 1915, into areas in southeastern Alberta and southwestern Saskatchewan, formerly devoted to ranching. The extremely dry years following 1914 experienced by this district seriously crippled these new settlers and in order to assist them, especially in view of the need for increased food production caused by the war, grants of seed grain, fodder, and other forms of relief were made during the winter of 1914-15, and the following spring. The area, however, has proved too dry for grain farming, although suited to grazing, and while considerable portions of these loans were repaid the result as a whole was that grain farmers moved to other districts and much of the land was tied up by the liens for advances by the federal and provincial governments and by loan companies. Some settlers, who had remained, desired to secure additional lands and to get a sufficient acreage for grazing, and others were anxious to come in to undertake the pasturing of cattle. Both were prevented by the existence of these liens.

Soy-Beans In Canada

Plant Was Introduced Into This Country In Early Year Of Eighteenth Century

The soy-bean is an ancient cultivated plant of China and Japan. It is said to have been introduced into North America during the early years of the eighteenth century. It was not, however, till about 1800 that it began to establish itself in the agriculture of this continent. In Canada the main areas of production are the central and south-western portions of Ontario. Small areas have been grown in every province in the Dominion and the increasing interest in this crop, in conjunction with the development of earlier maturing varieties, indicates that the future will see a considerable increase in the production of soy-beans in Canada.

Demand For Pulpstones

There is a demand for good pulpstones and over half a million dollars worth are used annually in Canadian pulp mills. The 1926 Canadian pulpstone production is the highest on record, but only about 10 per cent. of the stones used in Canadian mills are produced in Canada.

An umbrella with teeth that grip the owner's sleeve has been invented. But will it snap at anybody who tries to steal it in a restaurant?

Her—You deceived me when I married you.

Him—I did more than that. I deceived myself.

"But it is very dear."

"No, madam, and it suits you divinely."

"Send it along, and I will see how it suits my husband."—Duen Humor, Madrid.

Penny Postage To All Parts of Empire Effective From Christmas Day

Ottawa.—Penny postage from Canada to all parts of the British Empire was restored on Christmas Day. A message from Premier Mackenzie King to King George bearing the Christmas greeting of government and people of Canada to His Majesty announces the reduction in the postal rates.

The message was sent by the prime minister to the governor general, with the request that it be cabled to King George.

The message went forth to Buckingham Palace as follows: "Never have the minds and the hearts of the British peoples everywhere been drawn more closely together," said the message after stating that "we join our prayers to those of all parts of the empire for the complete restoration of your majesty to health and strength."

"We have felt that at this Christmas season we should like on the part of Canada to give enduring expression to this oneness of feeling and to the nearness of the relationship of our country to all other parts of your majesty's dominions," the message continues. "We have decided, accordingly, on Christmas Day to restore the penny postage rate on communications from Canada to all parts of the British empire."

Canada thus is leading the way in bringing back the two-cent postage rate within the empire which was discontinued when the war broke out.

Premier King, in making public the message, said it was the confident hope of the government that the lowering of the rate would encourage communication between Canada and the other countries and thereby foster greater unity and a better understanding among the people who make up the British empire.

Alberta Resources Question

New Offer By Federal Government Is More Satisfactory

Edmonton.—A new offer from the Dominion Government for the transfer of Alberta's natural resources to provincial control is the outcome of the conference just held in Ottawa, according to Hon. R. G. Reid, provincial treasurer, who is the first of the Alberta ministers to return home. This offer is better than any yet made, says Mr. Reid, and is not based on any accounting of previous receipts and expenditures.

As soon as Premier Brownlee returns and the Executive Council can get together, the offer now on the boards will be taken up by the Government, prior to introduction in the Legislature. No public announcement of the terms is being made in the meantime, the matter having first to be decided, as to acceptance or rejection by the Government.

Thompson Re-Appointed

Ottawa. Col. John Thompson has been re-appointed as chairman of the Board of Pension Commissioners. Official announcement to this effect was made by Hon. J. H. King, minister of health and pensions. The ten-year term of Col. Thompson recently expired.

Takes Police Post

New York.—Grover Whalen has given up his \$100,000 a year position as general manager of the Wanamaker Department Stores, and entered upon his duties as New York's \$100,000 a year chief of police.

Witnesses Point Out Evil Effects Of Mixing On The Grain Industry

Yorkton, Sask.—Farmers of north eastern Saskatchewan as witnesses before the Royal Grain Commission here, stated that mixing was an evil that is damaging every phase of the grain industry with the exception of private lake terminals.

Claiming that he lost \$225 on a car of grain because of erratic work of the Winnipeg inspection department, W. F. Golden, farmer of Ebenezer, condemned mixing as a vicious principle degrading Canadian wheat and unjust to the old country buyer as well as to the producer.

Make Big Drug Seizure

Narcotics Seized At New York Pier Valued At Five Million

New York.—Narcotics valued by federal authorities at \$5,000,000, were seized by special agents of the treasury department at a Hudson River pier.

The seizure was described by United States Attorney Tuttle as the largest of its kind on record.

Tuttle said arrangements for bringing in the contraband which arrived Friday, on the French liner Rochambeau, had been made by a man named Klein, a name which was one of the aliases used by Joseph Unger, recently arrested on narcotic charges growing out of the investigation of the slaying of Arnold Rothstein, Broadway gambler.

The narcotics, contained in five large packing cases, were marked as being trans-shipped to an unidentified consignee in Philadelphia.

Four of the cases seized were opened by special agents and were found filled with opium, cocaine and morphine.

Radio Commission

Will Visit Europe

Will Go Thoroughly Into All Systems Of Broadcasting

Ottawa.—The radio commission investigating the whole question of radio broadcasting in Canada, will leave for Europe about the middle of January. The work of the commission will carry it to England, France, Germany and possibly Belgium over a period of six weeks.

The system of the British Broadcasting Corporation will be carefully examined from every angle. The commission will then proceed to France, where broadcasting is handled partly by private enterprise and partly by the government. Members of the commission will then visit Germany, which has the British system of broadcasting in operation. The question of a visit to Belgium will depend upon developments.

Prominent B.C. Citizen Dies

Hon. Walter Nichol, Former Publisher Of Vancouver Province Is Dead

Victoria, B.C.—Death removed one of British Columbia's best known citizens in the person of Hon. Walter Cameron Nichol, LL.D., former Lieut.-Governor of the province and until a few years ago owner and publisher of the Vancouver Daily Province. His death occurred in the Royal Jubilee Hospital, where he was a patient for the past two months and where he underwent an operation. Although Mr. Nichol suffered from illness at intervals for several years past, he was in comparatively good health until about two months ago, when his condition became serious.

Bring In Lighthouse Keepers

Port Arthur, Ont.—After a four-day trip in upper Lake Superior, the tug James Whalen arrived in Port Arthur with lighthouse keepers who had been guarding lives throughout the shipping season. With the return of the light keepers, navigation has come to the final close. The government wireless station here will probably close within the next few days.

Cause Of Death Unknown

Coroner's Jury In Ralph McKay Case Unable To Determine What Caused Death

London, Ont.—The mystery of the fate of Ralph McKay deepened when a coroner's jury, after hearing medical testimony, returned a verdict to the effect that they were unable to state the cause of death. The son of Mr. and Mrs. J. H. McKay, of Regina and a student at Western Ontario University, disappeared strangely on the night of October 25 and for nearly two months diligent search failed to reveal any clue to his whereabouts. Recently his decomposed body was found in the River Thames by children.

The jury's finding was based largely on the testimony of Dr. Fred W. Luney, who was given charge of the body two hours after it was removed from the water.

Dr. Luney, who performed an autopsy, declared that he had found no marks of external violence and no fractures of any bones. There was no water in the lungs and the stomach, which was empty, did not indicate the convulsive struggle usual after death by drowning. Nor was any symptom of poison in the system.

"In fact," said the doctor, "I can not tell the actual cause of death."

Leave For Far North

Airmen To Check Up On Conditions Of Prospects Near Richmond Gulf

Winnipeg, Man.—Four airmen of the Northern Aerial Minerals Exploration Company left Winnipeg in two super-monoplanes to find out if "all is well" with a small party of the company's prospectors working on the eastern shore of Hudson Bay near Richmond Gulf.

The prospectors were brought to the bay by steamer. They have no means of communicating with the outside world and the only way they can get to civilization is to walk or go by plane.

The crews of the two planes will check up on the condition of the prospectors and probably bring them supplies from Sioux Lookout.

New Gas Well

Largest Producer Ever Struck In The Medicine Hat Field

Lethbridge, Alta.—Forty million cubic feet of gas daily was struck in the Eagle Butte well being drilled in the Cypress Hills, 35 miles southeast of Medicine Hat, the largest gusher ever brought in in the Medicine Hat field. The gas sands were tapped at 3,300 feet. The structure on which the well was drilled by Medicine Hat and Kansas interests headed by C. E. Roth, was blanketed a year ago last summer by the Harkness-Rowe interests, of Toronto, in a filling coup, in which 50,000 acres were covered \$50,000 being paid over the counter of the land office here in one operation. It is understood the gas is dry gas.

Canada Bans Polish Paper

Ottawa.—The Polish language publication, *Biez Bozy* (God's Whip), has been prohibited entry into Canada.

Rector Of Queen's University

Dr. O. D. Skelton, under-secretary of state for external affairs in the Canadian Government, has been elected rector of Queen's University in succession to Dr. Coverdale, whose three year tenure of office has expired. Dr. Skelton was graduated from Queen's in 1899.

Canada Adopts U.S. System

Issuing Identification Cards To Citizens At Windsor

Windsor.—The card identification system now used by the United States immigration inspectors at the Detroit docks of the Windsor and Walkerville ferries will be adopted by the Canadian inspectors, according to an announcement by O. G. Adams, immigration inspector in charge at Windsor. Cards contain the photograph of the applicant.

A green card will be issued to the Canadian citizen by birth, a salmon card to the Canadian citizens by naturalization and British subjects with legal landing status; a yellow card for the citizens of the United States and preferred countries only who have made legal entry into Canada and who are residents of the border cities employed in Detroit and commuting daily, and a yellow card with one perpendicular green bar for citizens of the United States who legally entered the United States and residents of Detroit employed in the border cities and commuting daily for crossing the border frequently on business.

Revolts Blamed On Ruler

Afghanistan King Has Not Paid Troops Is Report

London, Eng.—The trouble that King Amanullah of Afghanistan is having in suppressing revolts were said in despatches to be due to his failure to pay his army.

A despatch from Lahore, India, said that the army had not been paid for some time past. The Daily Mail printed a despatch from Bombay saying that the standing army of 35,000 was disaffected because of insufficient pay.

A Kurael despatch to the Daily Express quoted a merchant from Kabul, capital of Afghanistan, as saying that the King used army funds to pay for his many purchases in Europe. It was claimed that the army had not been paid for three months.

SAILS ON MAIDEN VOYAGE

The R.M.S. Lady Nelson, one of the five new vessels built for the Canadian National Steamships' fleet, in accordance with the Canada-West Indies Treaty, sails from Halifax on her maiden trip on December 14th. The photograph shows the Lady Nelson on her arrival in Canada from Great Britain, where she was built, and inset, her skipper, Captain J. M. Reith. The new ships are 8,000 tons and their passenger accommodation was designed specially for tropical travel. Already a number of winter tours from Canada to the West Indies have been booked for the various sailings of these new steamships.

Two New Destroyers To Be Built For The Canadian Navy

Explosion Shakes London

Violent Explosions Rip Up a Mile Of Pavement

London, England.—Leaping gas flames illuminated the wreckage of torn streets in London's busy West End where a series of violent explosions ripped up the pavement as though with a giant plow for nearly a mile.

In perhaps a dozen streets, the roadway was in ruins. Probably a score of persons were injured with burns or bruises, or affected by gas fumes.

Vehicles and lamp posts were overturned and great chunks of paving stones and manhole covers were buried in every direction through the fronts and roofs of buildings.

The first explosion occurred in the post office tunnel; others followed rapidly, heaving up roadways and rocking the entire neighborhood so much that it was feared momentarily London was experiencing an earthquake.

Fire broke out in many of the broken gas mains and there was a fierce blaze for a while on the premises of the Overseas Film Service, the fire apparatus being kept busy all day.

The origin of the explosion is undetermined, although one report, credited for a while, had it that the first blast occurred when a workman crawled into a tunnel with a blow torch. Damage estimated at from \$500,000 to \$1,000,000.

Several hundred people living in flats of the damaged area were rendered temporarily homeless as a result of the explosion.

Quebec Accepts Dawn Film

British Made Edith Cavell Picture Passed By Censors

Montreal, Que.—"Dawn," the British made Edith Cavell film, which has been the subject of considerable controversy in Britain and elsewhere throughout the Empire, has been passed by the Quebec provincial censors. Banned in Great Britain, it has also been rejected in Ontario and Saskatchewan, but is said to have been accepted by the authorities in the other provinces, and the holders of the Canadian rights are hoping that in view of Quebec's decision, the Ontario and Saskatchewan censors will reconsider their decision. The picture has been shown in New York. Sybil Thorndyke, one of the most distinguished of British actresses, takes the role of the martyred English nurse.

Promises Not To Interfere

U.S. Will Respect South America's Rights, Says Hoover

Buenos Aires. La Poca, a newspaper which is generally regarded as a spokesman for President Irigoyen, said that Herbert Hoover in conversation with the Argentine president, told him that in the future the United States government would never intervene in the internal affairs of other countries, that it would recognize their right to manage their own problems. President Irigoyen was quoted as saying that he believed that Mr. Hoover was not in accord with the ideas of President Coolidge.

Ottawa. Canada's naval force, at present limited to the destroyers "Champlain" and "Vancouver" and a number of mine sweepers, will receive added strength in 1931 when two new destroyers of the "Amazon" class are delivered.

The contract for the new men of war was given to Thornycroft, Limited, of Southampton, England. It was announced here, at a price of \$3,350,000. Fifteen ship building firms submitted tenders, one of them Canadian and the others British.

The destroyers, of the "Amazon" class, are the latest type, designed and are armed with four 4.7 inch guns and two anti-aircraft guns. They have two triple 21-inch torpedo tubes. The new vessels are 320 feet long, have a speed of 35 knots and carry a complement of 150 officers and men.

The destroyers will replace "Patriot" and "Patrician" which were retired from service a year ago. These two destroyers, together with the light cruiser "Aurora" were presented to Canada by the British government following the war. The "Aurora" was laid up several years ago, but "Patriot" and "Patrician" remained in service.

Last January the crews of these two destroyers proceeded to England to bring over two other vessels which were used in replacement and which were re-named "Champlain" and "Vancouver." These ships were also received on loan from the British government pending the construction of the new destroyers.

Special features to meet the demands of Canadian climatic conditions will be embodied in the new men-of-war. Consideration must be had of the extremes of climate in Canada which have the effect of "sweating" the hull in both summer and winter. The life of the new ships is estimated at 15 years, although they are believed to be serviceable for 20 years and probably longer.

The new Canadian destroyers are the first war vessels to be ordered and built as such by the Canadian government. During the great war a large number of mine sweepers were constructed and employed in the Atlantic, but in the general concept of warships Canada has not hitherto built any in the routine course of affairs.

Miner-Harvesters

Saved Money Here

Over 1500 Remained In Canada Says Secretary For Dominions

London, England. Detailed figures on the movement of British miner-harvesters to Canada last autumn were furnished in the House of Commons by Rt. Hon. L. C. Amery, secretary for the dominions.

He said 8,444 men went to the harvest fields from Britain, and 6,876 returned, leaving 1,573 in the Dominion. Of those returning, he continued, 4557 had received a loan for whole or part payment of return passage.

Mr. Amery said he believed he was justified in stating that men could save from \$100 to \$200 from their work in the Canadian harvest fields, and that a very substantial portion of the men did save money.

Stanley Baldwin Is Devising Means To Help British Miners

London, England. The policy of moving unemployed miners out of the distressed coal fields districts to more promising parts of the country under government direction was, if in the end successful, the only means of affording permanent relief, stated Premier Stanley Baldwin in the House of Commons. The prime minister was making an additional statement on the government's proposals for dealing with the problem.

The government is giving \$750,000 already collected by the fund; is using \$500,000 in transferring men and is going to contribute to the lord mayor's fund an equal proportion of future collections.

Premier Baldwin believed it a duty to say that absorption of labor from the distressed areas would seriously interfere with unemployment elsewhere.

The schedule of training centres to fit miners for agricultural work in the place of industrial employment would be greatly extended in the coming years, the prime minister promised. The program for the next year would provide for sending at least 6,000 trained or tested men to Canada and it was hoped the recent reductions in ocean passage would be a real stimulant to the normal movement of migrants outside government schemes. He urged employers of Britain to second the government measures by taking on men from the distressed areas, even if only one such man was employed by a firm.

Raymond Locals

Among the out of town school teachers spending the holidays with friends and relatives here are: Orvin Hicken, Benny Hicken, Gerald Gibb, Inez Lamb, and Winnie Stone.

The Normal students spending the holiday at home are Reed Kirkham, Muriel Webster, Ethel Peterson, Emma Hicken and A. Earl.

Mrs. Harry Bishop and children of Spring Coulee are spending Christmas week here visiting relatives.

Last Sunday evening members of both wards at Raymond had the pleasure of listening to Apostle James E. Talmage deliver his regular Sunday evening address through Radio Station K. S. L. Salt Lake City. It was very disappointing when the lights went out at about 9:30 o'clock receiving sets in both wards being of the electric type the program was not finished.

Jones Reading—Lenore Scoville. orchestra number—Direction of Milton Strong. M. Mens Quartette C. B. Strong. Christmas Carols and Songs—Direction C. B. Strong.

Second ward announce Musical Recital for Sunday January 6 1929. To be given by Wm. Clarke—Soloist. Lief Erickson—Violin.

At the term closing party at the Raymond High School this week the student body presented Mr. N. L. Mitchell with a handsome signet ring as a token of the high esteem in which he is held by them.

SPRING COULEE MAN INJURED IN COLLISION

Eric Moody of Spring Coulee had his jaw broken and suffered other injuries necessitating his removal to the Galt Hospital, Lethbridge, when a Chrysler sedan driven by A. J. Wood and Cliff Nielsen of Magrath crashed into the Chevrolet being driven by Moody as he was returning to his home in Spring Coulee.

The accident occurred near the Joiner farm. Messers Wood and Nielsen were returning to Magrath from Spring Coulee and the two cars crashed before either could avert the accident. Both cars were badly damaged and had to be towed into Magrath, a distance of about ten miles. A car was procured and Moody rushed to Lethbridge where medical attention was given.

A. W. Wood suffered several broken ribs and Cliff Nielsen had his face badly bruised and scratched. Medical attention was given at Magrath and both are progressing favorably.

Norman Duncan of Banff is a visitor in Raymond. His presence was found most useful at the Recorder office.

CHAPTER X.—Continued.

"One of the office men by name of Renwick. He's one of them narrow-between-the-eyes, prawn-skin' old has-been that sez 'tut tut' every time he hears a logger say 'damn.' His health is poor, so they're goin' to send him up here to take charge of this mill. Thanks be, I'm goin' to have charge in the woods, so I won't have nothin' to do with him."

They discussed the matter during the day, and that evening they again visited the falls. From the trapper Donald learned that the supply of water was unfailing. Owing to the natural formation, the cost of building the dam would be small. Donald's friends became as enthusiastic as himself.

"We'll be finished to-morrow night," Douglas, announced Gillis that evening. "If you and Donald want to, you can go to town and put this proposition up to your father."

The lines of steel were creeping north slowly but surely. As they left the cabin to start for the Coast, the first faint boom of a blast was brought to their ears by the southern breeze. Ten miles south of the lake they came to steel and rode to Squamish in the cab of a locomotive, reaching Vancouver that night.

Douglas informed Donald over the phone the next morning that his father would give him a hearing at two o'clock that afternoon.

As Donald thought of the impending meeting he experienced certain inward qualms. He felt that Renwick would oppose him, and wondered if Robert Renwick would consider him concealed and forward in suggesting such a radical innovation.

At the appointed hour Donald and Douglas entered the office of the R. C. & L. Co. Robert Renwick greeted Donald with a friendly smile and motioned to chairs near the desk. "You have some papers with you, I presume," he said.

Donald placed the rough plans on the desk before him. For five minutes Robert Renwick studied them quietly while Donald fidgeted. Without comment, he leaned back in his chair for a moment, apparently in deep thought. Presently he pressed a button at the side of his desk.

"Send Renwick, Bolton and King here," he said to the boy who answered the bell.

As the men entered the room Donald had no difficulty in recognizing Renwick from Gillis's description. Robert Renwick rose to introduce Donald, then spoke in quick, flashing sentences that went straight to the heart of things, as he spread the plans on the table before them.

As Donald had anticipated, Renwick, after a short scrutiny of the papers, objected strenuously, his chief objection being the initial cost, together with the fact that experience had demonstrated that only small mills had proved a success when electrically driven. Bolton was of the same opinion, but he admitted that

if the supply of timber were sufficient to keep the mill in operation for years, the initial cost would be offset by the economy of operation.

King, the company's chief engineer, vouchsafed no opinion, but sat with Donald's plans before him, copying the figures in his note-book.

Robert Renwick glanced at Donald expectantly.

Donald spoke of the lessened cost of operation in an electrically-driven mill by the reduction of the number of millwrights, oilers and helpers, the lower insurance rates, the saving on line-shafting, belts and oil, of the advantage in speed over a steam mill, etc. As he warmed to the subject he came to his feet and leaned over the desk.

"As you gentlemen know, the greatest enemy of the mill-owner is fire. With a steam-mill of the size you are to build, with donkey engines and locomotives operated by steam, you will have a battery of smokestacks that will be an hourly menace during the summer months in the dry air at that altitude. Electrify your mill and donkey engines and you will reduce the fire hazard by seventy per cent. I don't ask you to accept my opinion. I advise you to investigate thoroughly before deciding. An electric mill with the enormous power available would be a credit, not only to this company, but to the Province as well."

Robert Renwick's brain functioned with a clear-cut precision. He would listen to the advice of his experts with an attentive ear, and his decision was usually made before the last one had ceased talking.

While Donald was talking Robert Renwick sat forward in his chair with a look of almost strained attention. As Donald finished he swung quickly to his chief engineer. "King, tomorrow you go to Summit Lake, furnish a full report. If your figures correspond with McLean's we will install an electric plant. Bolton, get quotations at once on electrical equipment. That's all," he finished tersely.

He turned to the two young men as the door closed. "Beginning with the first of next month, McLean, if you so wish, you will act as assistant manager at the Summit Lake Mill. And you," he turned to Douglas, "will occupy a similar position at the Cheakamus plant." He rang for his stenographer, who entered at once.

Donald muttered an embarrassed thanks, and as he passed through the door he heard Robert Renwick's voice in rapid dictation.

They spent the remainder of the afternoon buying supplies from the list which Andy had furnished them. There were numerous delicacies in the items of foodstuffs that brought exclamations of surprise from Douglas. "There is everything here to serve a banquet; even tablecloths and napkins. What is the little beggar up to now, I wonder?" he said laughingly.

"His birthday," explained Donald. "He is going to invite the Wainwrights and John Miller. And besides," he added, "I think he wants to show the old trapper that he can do a little fancy cooking himself."

Janet Renwick could not interpret the lazier urge that prompted her to arise at an early hour the next morning to drive her brother to the wharf. It rather bewildered her—made her ashamed of herself that she could not put Donald from her mind entirely. "Why can't you forget him?" she asked herself in protest for the thousandth time. As the boat pulled away from the dock she waved an adieu and, with a troubled look in her eyes, swung her car cityward.

For two days after their return to the mountains, their little cabin was a hive of industry. Andy banished his fellow-lodgers to the outdoors at every opportunity while he performed mysterious rites over the small stove. "I'll show that juggling old pirate what a real meal is like," he chuckled to himself.

Their guest arrived late in the afternoon and sat outside in the warm sun while Andy busied himself behind his closed door.

Old John's face shone from vigorous application of soap and towel. His sole change in attire for the occasion was a clean buckskin coat from the breast pocket of which protruded the corner of a red silk handkerchief.

Connie's abundant golden hair had been carefully brushed, and hung over her shoulders in glistening, billowy waves that reached to her waist-line. She seated herself a short distance from the party and took no part in the conversation. This was her first social affair and she felt ill at ease. Donald's repeated attempts to break her reserve were answered in monosyllables.

The door opened to disclose a remarkable figure framed in the entrance. Andy stood before them in the most ridiculous make-up of a but-

ler. An old black coat of Gillis's, cut off at the sides to form a "claw-hammer," hung loosely over his narrow shoulders; side-whiskers of tree moss were stuck to his cheeks, and his face was as stolid as a graven image.

"Dinner is now being served in the main dining-hall, me lord," he intoned slowly.

They applauded Andy's effort heartily, and as they laughingly entered the cabin a scene met their eyes that was remarkably incongruous amid such drab surroundings.

A snow-white cloth covered the rough board table. A huge turkey, with bulging breast browned to a crispness, graced the centre of the board. Oysters in the shell, celery, salads, several kinds of vegetables, pies, cookies and fancy cheeses were in tempting abundance; and in a place of honor near the turkey reposed Andy's birthday cake, its frosted surface covered with tiny candles.

Connie's blue eyes opened wide with wonder. "Oh, Dad!" she cried joyously. "It's just like stories, isn't it?"

John tossed his hat to the floor in the corner. "You can deliver the goods of time, sure enough," he commended in a tone of respect.

It was an odd party that gathered in the log hut in the wilderness to celebrate Andy's birthday—a wilderness whose silence was soon to be broken by the crash of trees and the clang of steel. A late blast, so near that the cabin trembled, caused the old trapper to shiver slightly.

"Trains will soon be running through your backyard, John," observed Douglas.

The old man shook his head sadly. "Yes," he concurred, "an' I'll hev to be blittin' the trail again before long."

Andy's banquet proceeded merrily, and when the last course was finished Donald took a bundle from the shelf and placed it in Connie's hands. "Something I brought from town for you," he smiled.

Connie's colour heightened. "For me?" she asked incredulously. "Yes, some reading matter."

"Thank you," she murmured softly, as her quick fingers unwrapped the package. She cried aloud with delight as half a dozen novels and as many magazines were disclosed to view.

"And here, Andy, is a present for you," said Donald as he dragged a box from the corner, "something to assist in passing away the time pleasantly."

Andy's joy knew no bounds when, opening the box, a superb Victrola was disclosed to view.

Suddenly the sweet strains of a full orchestra playing the "Barcarolle" filled the room. Connie was enraptured. She stood with bowed head and closed eyes, her hands pressed to her throbbing breast, as the music stirred her emotional soul to its depths. She sighed deeply and her cheeks were wet with tears as she moved to the machine when the music ceased.

They all sang the chorus to the "Old Oaken Bucket," "Swanee River" and "Auntie Laurie." Connie's embarrassment had vanished and her clear voice rang in sweet harmony with the deeper tones of the men.

At the conclusion of "Home Sweet Home," old John Hillier blew his nose vigorously and surreptitiously dabbed the big red handkerchief to his eyes.

(To Be Continued.)

Minard's Lulment for Chapped Hands.**Farm Implement Industry**

Production For the Year 1927 Valued At Over Forty-Two Million Dollars

Production from the agricultural implements and machinery industry in Canada was valued at \$42,996,288 in 1927, according to a compilation recently completed by the Canadian Government Bureau of Statistics. This output was 12 per cent. above the value of \$38,269,214 reported for the previous year which in turn showed a gain of 54 per cent. over the total of \$24,770,216 reported for 1925. Of the 65 firms classified in this industry in 1927, there were 43 located in Ontario, 12 in Quebec, 4 in Manitoba, 4 in Alberta, 1 in Saskatchewan, and 1 in Prince Edward Island.

Products made by these firms included harvesting machinery valued at \$11,402,438; horse and power tillage implements at \$6,880,306; planting and seeding machinery at \$3,274,603; baling machinery, \$2,758,333; hand tools \$683,772; other farm equipment including machinery parts and accessories, \$4,615,754; washing machines, \$2,800,761; pumps, \$592,100; gasoline engines, \$343,209; and many other commodities.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Canada Will Co-Operate

British Dominions Plan To Exchange Information On Research

Canadian co-operation with Great Britain and the other overseas Dominions in the matter of agricultural research, has been arranged for by Dr. J. H. Grisdale, deputy minister of agriculture, who recently returned from a three weeks' conference with representatives of all these countries in London. Following the decision last year the meeting was held to work out detailed arrangements for the exchange of information bearing on research. The cost will be borne proportionately.

It has been considered desirable to centralize the institutions in various parts of Great Britain. There is one for soil research and others include animal diseases, cereal plants, forage, horticulture and animal breeding.

The latest scientific data from research in all these or similar subjects will promptly be made available to the agriculture departments of all the Dominions. Dr. Grisdale in addition to attending the conference of government representatives, got in personal contact with all the institutions.

Thriving Centre In North

Fairview In Peace River District Is End Of Steel

Fairview, the present end of steel in the country north of the Peace River District, greeted its first passenger train on November 2. It has already become a thriving centre with two banks, five general stores, three hotels, a picture theatre and numerous other adjuncts of urban life. The story of how rapidly it has been brought into being is of a kind with which we have been nothing like as familiar of late as we were some years ago. With another era of development well under way, it will be repeated frequently from now on. Many of the buildings at Fairview are new, but some have been moved from Waterhole. The arrival is chronicled of a hotel, a Masonic hall, a rest room and a manse. This breaking up of an old community is always regrettable, but a town usually has to accept the role of mahomet when a railway declines to come to it.—Edmonton Journal.

Model Mining Town

Ambitions Project Planned For Lethbridge Northern District

The development of a model mining town in the heart of the Lethbridge Northern district is said to be the objective of the new Cadillac Mine at Wallace (north of Diamond City), and the Lethbridge Northern officials. Among other things, the town is to be surrounded by small tracts farms to be cultivated by miners with families, the gardens being, of course, amply supplied with water. According to James Pike, colonization manager of the Lethbridge Northern, the new town of "Wallace" can be made an ideal place to live in, and that is the aim of the two contracting parties.

Alberta Cattle For Japan

Twenty-One Head Of Holstein Cattle Have Been Purchased

Negotiations have been completed between the Alberta Government and a firm of Japanese importers with headquarters in Yokohama, for the shipment of twenty-one head of choice Holstein cattle from this province to Japan. The cattle chosen for this consignment have been selected from a number of dairy herds in different parts of the province and include several cows with high milk records. A number of these cows along with two bulls will provide foundation stock for improved dairy herds in Japan.

The Japanese Government is also contemplating the importation of Alberta hogs.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Didn't Hurt the English

It's an old saying, "A Greek Christmas brings a full graveyard," yet a party writes that she only saw a white Christmas once in the Old Country during a period of 30 years. In spite of that there were enough English men left, and women, too, to play some little part in winning the great war.

Fish seem to need more food in warm weather than in cold, experiments indicate.

Minard's Lulment for Grippe.

Will Not Leave Cities

Specialists In Russia Prefer Unemployment To Working In Small Towns

Ten thousand technical specialists are listed among unemployed by the Soviet Labor Bourse at the same time that the country is struggling with the problem of insufficient technical personnel.

This apparent contradiction is explained by the circumstances that the unemployed specialists are in Moscow, Leningrad, Khar'kov and other large cities, while the unfilled jobs are in the coal fields of the Donetz Basin, in the oil fields of the Caucasus and other even more unattractive provincial places.

The Labor Bourse in Leningrad alone lists 1,800 unemployed specialists; Moscow has at least as many and other cities show corresponding figures. The majority of these unemployed are young graduates of the technical schools, who apparently prefer privation in the city to a job and a regular salary in the province.

Three-quarters of the new graduates, a Soviet newspaper points out, refuse to accept positions away from the cultural advantages of the urban centres. Higher wages and other inducements do little to overcome their distaste for life in the country.

In addition to these registered unemployed, there are doubtless hundreds more who have not placed their names on the list of the jobless, having accepted positions as office workers or store clerks rather than leave the urban life.

It is generally known that a similar situation exists in relation to physicians. While villages and provincial towns beg and clamor for doctors, thousands of them—especially young ones—are looking for work in Moscow, Leningrad, etc.

Next Imperial Conference

No Arrangements Have Yet Been Made For Any Meeting In 1929

In reference to a statement that the Australian government has urged that an imperial conference be held in 1929, Reuter's Agency learned there has never been any fixed date for the conference. So far no arrangements have been made for any meeting next autumn, and in view of the British general elections being held next summer it is improbable an imperial conference will be held. The last imperial conference was held in 1926.

In a cargo from America that was delivered at Liverpool, England, recently, were 46,000 boxes of apples, 853 boxes of pears, 900 boxes of grape fruit, and 1,000 packages of prunes.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

What the world needs is a telephone bell that will tell who is ringing at the other end.

"She hath done what she could."—Mark xiv. 8.

And rank for her meant duty, vari-ous. Yet equal in its worth, done worthily; Command was service, humblest service done By willing and disengaged souls was glory.

—George Eliot.

This Bethany loyalty is the simple requirement of religion. Not one cent, not one moment, not one loving impulse, not one thought, not one syllable of a creed, more than comes within the range of your possibilities, is expected; but all of this is expected, nothing less will do. God asks for no more, but all this He does expect, and man has no right to evade it. Let duty be its own reward, love its own justification. "She hath done what she could,"—this is the fulness of the Christian excellence; it is the ultimate standard of religion.

—Jenkin Lloyd Jones.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood, and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use as other medicaments for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Mother—You mustn't eat ice cream like that. I knew a boy who ate his ice cream so fast that he died before he had eaten half.

Little Willie—What happened to the other half?

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Prepared For Fog

Duncan McDwan, Glasgow, scientist and member of the British Association, has no fear of losing his way in rain or fog. He carries the firmament with him. The scientist possesses a perfect map of the stars, adjusted to scale—in the top of his umbrella.

Shoe leather is a good substitute for gasoline, but few people seem very keen about trying it.

Appel—How gracefully Jacobs eats corn from the cob. Brearly—Yes. He ought to. He's a piccolo player.

**Nervous and Run Down
The Least Noise
Would Bother Her**

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

BIG MAGRATH CARNIVAL OPENS WEDNESDAY

Magrath Carnival, under the direction of the First and Second Wards of the L. D. S. Church for the purpose of obtaining funds for both wards, opens to the public Wednesday evening December 26 and continues for three days, 26, 27, and 28 of December. Benjamin Matkin is the chairman of the general committee and E. P. Tanner is secretary treasurer. Members of the various committees include the officers in the various church organizations. G. L. Woolf and Mrs. I. R. Bennett compose the advertising committee. The Y. M. M. I. A. have charge of soft drinks and hot dog stands. The Y. M. M. I. A. and Sunday Schools will operate the games of skill and amusement booths. The Primary will operate the fish pond and have a sewing booth. A real old time Rafted Society Supper will take place Thursday evening December 27. This will be one of the biggest events of the Carnival.

A character Ball for the children will be held Friday afternoon. A Grand Ball will be held each evening with special attractions.

Voting for the Carnival Queen is well under way. The following popular young ladies have been chosen as candidates, Clare Coleman, Iola Sabey, Reah Holman, Isabel Steed, and Fanny Taylor.

All committees are working hard to make this the best Carnival ever held in Southern Alberta.

Mrs. James Meldrum as chairman of the decorating committee with her helpers have decorated the Assembly Hall specially for the occasion.

Final Performance Given.

The final performance of Magrath Festival was presented to a large audience of Thursday evening last in the Assembly Hall under the direction of William Blumel, L. S. Taylor and Miss Idell Toomer.

Special credit for the success of the performance is due Billie Blumel who trained the cast and lent both his time and talents untiringly.

All of the cast did very well special mention must be made of the exceptional work of Hall C. Powlan as Monty Brewster. This young man displayed remarkable ability in the rendition of a very difficult role.

The story of the comedy centers around a legacy of a million dollars left Monty by his grandfather. A further legacy of seven millions was later left Monty with the stipulation that he spend the entire Million left by the grandfather legitimately within a year. Profound secrecy must necessarily surround the purpose of Monty's frenzied finance. He endeavors to employ all his friends in various capacities and a great many humorous situations are created as they endeavour to save a part of Monty's fortune for him. However all ends happily and he manages to get rid of the million on his twenty-sixth birthday.

Magrath Festival has been a splendid success both from points of quality of entertainments given and financial reward.

During the intermission between the third and last acts Mrs. H. S. Taylor in behalf of the general committee thanked all those who had in any way assisted in making the Festival a success, especially those from out of town who had lent their talents to the festival.

Owing to the fact that no Chautauqua was visiting Magrath this year a number of citizens had suggested a festival of home talent, to be given in consecutive performances. So the idea of Magrath Festival was born and judging from the applause given to the suggestion of Mrs. Taylor that it continue next year it may continue to be an annual occurrence.

Fostered by the Shakespeare Literary Class and assisted by a general committee composed of prominent citizens the Festival has proven a series of most interesting entertainments. Local talent has responded generously, augmented by musical talent from Cardston, Raymond and Stirling and lectures by D. H. Elton of Lethbridge and Professor Ottewill of Edmonton the Festival provided the public with the better class of unique and instructive entertainment. Special mention should be made of the work of E.E. Riethman in painting special scenery to suit the play presented.

Mr. Riethman is a talented artist. He painted a full sized imitation of the Venus De Miles on ordinary plaster board for the Old Homestead play that was so realistic that people in the audience wondered from whence came the marble statue.

MAGRATH LOCALS

Chas. Matkin is also numbered among the wounded as a result of head on collision with Floyd Toomer while engaged in a basket ball game here the other night.
